## Beginner Guide React

As I learn to build web applications in React I will blog about it in this series in an attempt to capture the questions that a complete beginner might encounter that a more seasoned developer would take for granted!

## Scope & Closure

### Scope & Context in JS

The **scope** of a program in JavaScript is the set of variables that are available for use within the program.

A screenshot of the Mihir Beg Music website. The hero section features a photo of Miles Tone at a mixing console. The title "Mihir Beg Music" is displayed prominently. Below the title is an optional subtitle: "Optional hero section subtitle". A description follows: "A podcast for Web developers interested in building Jamstack websites. Hosted by Miles Tone." A "Subscribe to YouTube Channel" button is visible. At the bottom, there is a "Latest Episodes" section and a "Black Lives Matter" badge.

## Convolutional Neural Networks

Artificial neural networks, usually simply called neural networks, are computing systems vaguely inspired by the biological neural networks

## Jamstack

### Why Jamstack Jamstack is the new standard architecture for the

web. Using Git workflows and modern build tools, pre-rendered content is served to a CDN and made dynamic through APIs and serverless functions. Technologies in the stack include JavaScript frameworks, Static Site Generators, Headless CMSs, and CDNs.

## Asynchronous JavaScript

The term **asynchronous** refers to two or more objects or events **not** existing or happening at the same time (or multiple related things happening without waiting for the previous one to complete). In computing, the word "asynchronous" is used in two major contexts.

## ITER Fusion Reactor Experiment (Southern France)

### Break Even Nuclear Fusion Candidate

In December, researchers at the Joint European Torus (JET) started conducting fusion experiments with tritium — a rare and radioactive isotope of hydrogen. The facility is a one-tenth-volume mock-up of the US\$22-billion ITER project and has the same doughnut-shaped 'tokamak' design — the world's most developed approach to fusion energy. It is the first time since 1997 that researchers have done

#BlackLivesMatter

SINCE 1977 THAT RESEARCHERS HAVE DONE

experiments in a tokamak with any significant amount of tritium.

# Resume & Portfolio

**Bryan Guner**  
551-254-5505 | [bryan.guner@gmail.com](mailto:bryan.guner@gmail.com)

**Skills:**  
**Languages:** JavaScript ES-6, NodeJS, HTML5, CSS3, SCSS, Bash Shell, Excel, SQL, MATLAB, Python, C++  
**Frameworks / Libraries:** React, Redux, ExpressJS Gatsby, NextJS, Ant-Design, LESS/SCSS, Loadash, Jest, Sequelize, GraphQL  
**Databases:** PostgreSQL, MongoDB, SQLite3  
**Tools:** Figma, Git, AWS S3, Heroku, Docker, Jira, Trello, Confluence, Nellyfi, Digital Ocean, VSCode, Google Analytics,  
**Operating Systems:** Linux, Windows (WSL), IOS

**Projects**

**Gatsby-GraphQL-Blog** [Live Site](#) [GitHub](#)  
*Java Script, React / Gatsby | GraphQL | SCSS | Lodash | Jamstack | Facebook Comments API | jQuery*  
 A [web development blog](#), featuring convenient web development tools and interactive content.  
 • Implemented several Gatsby page models and GraphQL schema to fetch markdown content and feed it into react components.  
 • Designed and integrated a set of convenient web-hosted developer tools and GUI interfaces.  
 • Added interactive content including comments, [video conferencing](#), [data-structure visualization](#), [games](#) and full text search.

**Autonomously Triggered Guitar Effects Platform** [Live Site](#) [GitHub](#)  
*C++ | Python | MATLAB | PureData*  
 Platform designed to analyze a time sequence of notes and autonomously trigger guitar effects at a predetermined point in the song.  
 • Successfully completed and delivered a platform to digitize a guitar signal and perform filtering before executing frequency & time domain analysis to track a current performance against pre-recorded performance.  
 • Implemented the Dynamic Time Warping algorithm in C++ and Python to autonomously activate or adjust guitar effect at multiple pre-designated sections of performance.

**Family Promise Service Tracker** [Live Site](#) [GitHub](#)  
*React | ExpressJS | Figma | Okta*  
 An [app](#) built to help local communities coordinate their compassion to address the root causes of family homelessness.  
 • Collaborated on state management using Redux to handle application state and middleware using redux-promise & redux-thunk.  
 • Built two graphic visuals of the user hierarchy and the scope of their permissions.  
 • Created Figma UI mockups of possible future developments, i.e., displaying metrics data and map pinpoint functionality.

**Experience**

**Product Development Engineer | Nov 2019 - Mar 2020**  
*Cembre, Edison, NJ*  
 • Converted client's product needs into technical specs to be sent to the development team in Italy.  
 • Reorganized internal file server structure and conducted system integration and product demonstrations.  
 • Presided over internal and end user software trainings in addition to producing the corresponding documentation.  
 • Served as the primary point of contact for troubleshooting railroad hardware and software in North America

**Product Development Engineer | Nov 2019 - Mar 2020**  
*Cembre, Edison, NJ*  
 • Converted client's product needs into technical specs to be sent to the development team in Italy.  
 • Reorganized internal file server structure and conducted system integration and product demonstrations.  
 • Presided over internal and end user software trainings in addition to producing the corresponding documentation.  
 • Served as the primary point of contact for troubleshooting railroad hardware and software in North America

**Education**

**Lambda School, Full Stack Web Development** [May 2020 - Nov 2021](#)  
 Six-month immersive software development course with a focus on full stack web development. Over 2000 hours of work invested including class time, homework, and projects.

**B.S. Electrical Engineering**, TCNJ, Ewing NJ [2014 - 2019](#)  
 Knowledge of circuit boards, processors, chips, electronic equipment, and computer hardware and software, including applications and programming.
